SUMMARY

Final-year Computer Science Engineering student with hands-on experience in Java, JavaScript, and MERN-stack development. Built full-stack web applications, Chrome extensions, and AI-powered automation tools using REST APIs. Seeking entry-level backend or full-stack software engineering roles.

TECHNICAL SKILLS

Programming: Java, JavaScript, SQL
Frontend: React, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, MySQL
Developer Tools: Git, GitHub, Postman, Hoppscotch, Render, MongoDB Atlas
Concepts: OOP, DSA, DBMS, JWT Authentication

EXPERIENCE

AI Engineering Intern Jun 2025 – Jul 2025
SETU | Remote

- Developed a GenAI-powered chatbot using Prompt Engineering and Cursor AI, enabling context-aware conversational responses through LLM-based workflows.
- Built and deployed the chatbot using Vibe Coding methodologies, leveraging AI-assisted development tools to accelerate rapid prototyping and deployment.
- Applied prompt optimization and iterative testing techniques to improve chatbot response quality, conversational consistency, and user experience.

PROJECTS

FormPulse GitHub

JavaScript | Manifest V3 | Groq/Gemini API | Web Crypto API

- Developed a Manifest V3 Chrome Extension that leverages Groq and Gemini APIs to intelligently parse webpage DOMs and auto-fill complex forms, including dynamic React and Vue interfaces.
- Engineered a privacy-first architecture using the Web Crypto API (AES-GCM) to encrypt API keys locally, ensuring user data never touches external databases.
- Implemented a hybrid parsing engine utilizing exact-match algorithms and Levenshtein distance fuzzy-matching to accurately manipulate complex UI dropdowns and radio buttons.

Workforce Management System GitHub | Live Demo

MongoDB | Express.js | React.js | Node.js

- Built a full-stack attendance platform supporting 20+ workers with JWT authentication and responsive work logging.
- Developed responsive workflows for daily attendance, work-hour entry, and supervisor bulk submissions.
- Modelled attendance and work-log data with MongoDB and Mongoose for efficient daily record retrieval.

Open Wall GitHub | Live Demo

Node.js | Express.js | MongoDB

- Built a public messaging application with REST APIs for creating, reading, updating, and deleting community posts.
- Implemented persistent storage of user profiles and messages with MongoDB Atlas.
- Designed API routes for post management and structured server-side request handling using Express.js.
- Deployed the responsive application on Render for access across desktop and mobile browsers.

EDUCATION

RCC Institute of Information Technology Kolkata, West Bengal, India
Bachelor of Technology in Computer Science and Engineering — CGPA: 7.5 Aug 2022 – Jun 2026

Seventh Day Adventist Sr. Sec. School Kolkata, West Bengal, India
ISC (Class XII) — Percentage: 87% 2022

Seventh Day Adventist Sr. Sec. School Kolkata, West Bengal, India
ICSE (Class X) — Percentage: 89.5% 2020

ACHIEVEMENTS

Awards: Student of the Year (2021–2022) | Inter-School Debate Representative (District Level)
